**PUBLICATIONS** IEEE Transactions on Pattern Analysis and Machine Intelligence (PAMI) and International Journal on Computer Vision (IJCV) are the main journals of computer vision. PAMI and IJCV are consistently rated as the top journals in computer science (PAMI impact factor 9.455, IJCV impact factor 11.541 in 2017), with acceptance rate below 30%.

The main conferences in computer vision are IEEE Conference on Computer Vision and Pattern Recognition (CVPR), European Conference on Computer Vision (ECCV), and IEEE International Conference on Computer Vision (ICCV). They are highly selective, with around 25% acceptance rate (less than 5% for oral), and their proceedings play a role which is as important as international journals. For example, according to the latest Google scholar statistics, CVPR has h5-index of 188, compared to 118 for PAMI and 65 for IJCV. (See <http://goo.gl/0u9A7T>)
